Lead AI Product Developer | Full-Stack, Generative AI & Secure Systems Architect

linkedin.com/in/kürşatyılmaz · github.com/DevKursat · devkursat.github.io

Product-obsessed AI Systems Engineer & Full-Stack Architect with a verified track record of executing fast-paced, end-to-end product lifecycles—from rapid prototyping to pentest-hardened production deployments. Specialized in enterprise **Generative UI architectures**, autonomous LLM agent orchestration (OpenAI, Gemini), deterministic function calling (Zod/JSON Schema), and multi-tenant security (PostgreSQL RLS). Architected complex client suites for prestigious corporate institutions, including AI legal document assistants, autonomous restaurant hospitality agents, e-commerce, and high-concurrency civic mobilization platforms serving 5,000+ organic users.

ENGINEERING EXPERIENCE & ENTERPRISE PRODUCTION SYSTEMS

Lead AI Product Developer & Solutions Architect — BMI Law Firm (Maslak Corporate District)

Oct 2025 – Sep 2026 · Istanbul

Enterprise Legal & Commercial Suite

- **Gideon AI (Enterprise Generative UI Platform):** Architected an interactive LLM assistant for corporate legal intake that renders dynamic, stateful UI components (Generative UI Cards) at runtime rather than plain text, accelerating document turnaround by **60%** with Next.js App Router, TypeScript, and Supabase Edge Functions.
- **Vera QR (AI Hospitality Agent & Multi-Tenant SaaS):** Engineered an autonomous natural-language ordering agent, structured multi-turn conversation flow, multi-tenant PostgreSQL Row-Level Security (RLS) data isolation, and unified multi-currency checkout via Stripe and iyzico.
- **Commercial Fleet & E-Commerce Platforms:** Shipped a high-availability luxury car rental portal (dynamic telemetry scheduling, deposit capture) and an enterprise B2B e-commerce platform with automated invoicing and inventory synchronization.
- **Application Security & Penetration Testing:** Executed end-to-end vulnerability scanning and pentest hardening across all web and API layers; mitigated OWASP Top 10 vectors, implemented cryptographic rate-limiting, and guaranteed multi-tenant data segregation.

Tech Stack: Next.js (App Router), TypeScript, Python, PostgreSQL (RLS), Supabase Edge Functions, OpenAI API, Docker, Stripe, iyzico, Vercel

Founder & AI Product Engineer — İtibar (itibar.app)

B2B SaaS & Data Automation

Oct 2026 – Present · Istanbul

- Architecting a B2B intelligence and reputation defense engine featuring automated web speed auditing, AI Search Engine Optimization (AEO/GEO schema validation), and serverless telemetry pipelines.
- Engineered privacy-preserving data extraction workflows, deterministic compliance report generators, and resilient queue processing on Vercel Serverless Functions, Supabase, and PostgreSQL.

Tech Stack: Next.js (App Router), React, TypeScript, Python, PostgreSQL, Supabase, Tailwind CSS, Vercel Serverless

Founder & Lead Systems Engineer — Kürşat (Cross-Platform Social & Civic Platform)

Aug 2023 – Jun 2025 · Istanbul

5,000+ Users & Campaign Scale

- Architected, built, and launched a full-scale mobile social network, scaling to **5,000+ organic active users** within the first 30 days of release across iOS and Android.
- **High-Stakes Civic Engagement & Campaign Scalability:** Partnered with prominent national political leadership and high-profile grassroots campaign movements; engineered high-throughput event live-streaming, anti-bot spam filters, and real-time community engagement during peak election cycles.
- Designed custom feed ranking algorithms, real-time WebSocket messaging pipelines, and automated content moderation workflows.

Tech Stack: React Native, Node.js, MongoDB, WebSockets / Realtime, Mobile CI/CD, Anti-Spam Filtering

Full-Stack & Mobile Engineer — VoltNet (Unified EV Charging Network)

iOS, Android & Web

Aug 2025 – Aug 2026 · Istanbul

- Unified fragmented third-party charging station APIs into a single, high-performance geospatial map client on React Native and Web, reducing charging discovery and checkout friction by **~40%**.
- Engineered low-latency Node.js and PostgreSQL backend services handling real-time station availability, socket telemetry, geospatial bounding-box queries, and payment webhooks.

Tech Stack: React Native (iOS/Android), React.js, TypeScript, Node.js, PostgreSQL, Mapbox GL API, REST APIs

CORE TECHNICAL COMPETENCIES & SECURITY ARCHITECTURE

AI & LLM Orchestration:	LLM API Orchestration (OpenAI, Gemini), Generative UI (Dynamic Component Rendering), Structured Outputs (Zod / JSON Schema), Function Calling & Tool Execution, RAG Architectures, Vector Embeddings (pgvector), Prompt Optimization, Token Economics
Frontend & Cross-Platform:	TypeScript, JavaScript (ES6+), Next.js (App Router, Server Components, SSR/ISR), React.js, React Native (iOS & Android), Tailwind CSS, State Management (Zustand, Context), Mapbox GL, WebGL/Shaders
Backend, Cloud & Data:	Node.js, Python, PostgreSQL (Row-Level Security / RLS), Supabase (Edge Functions, Realtime), MongoDB, RESTful APIs, WebSockets, Multi-Tenant Database Architecture, Redis Caching
DevOps, Cloud & Pentest:	Docker, AWS (S3, EC2), Vercel Serverless, Git & GitHub Actions CI/CD, Linux/Unix, Penetration Testing & OWASP Top 10 Hardening, Stripe, iyzico, App Store Connect & Google Play, Figma

EDUCATION

Ankara University

Bachelor's Degree · 2023 – Present

Rigorous foundation in computer science principles, software architecture, data structures, and autonomous systems.

ENGINEERING DISTINCTIONS & LANGUAGES

- **GitHub Arctic Code Vault Contributor:** Open-source codebase archived for 1,000 years in the Arctic World Archive.
- **Secure E2E Delivery:** 5+ commercial web, mobile, and AI platforms architected, pentested, and shipped to production.
- **Languages:** Turkish (Native) · English (Professional Working Proficiency / Enterprise Client & Technical Communication).
