Full-Stack & Applied AI Engineer trained at **42 Istanbul** and **Ankara University**, specializing in building and scaling production web, cross-platform mobile (iOS/Android), and B2B SaaS systems. Proven track record of shipping high-impact software from zero to production—including a social platform that reached **5,000+ active users in its first month**, a unified real-time EV charging network, and enterprise **LLM / Generative UI** platforms. Strong ownership across system architecture, multi-tenant database security (PostgreSQL RLS), payment gateways, and agile product delivery.

5,000+ MAU	**5+ Shipped Systems**	**~40% Faster**	**4+ Sessions/Wk**
First-Month Organic User Adoption	End-to-End Web, Mobile & B2B SaaS	Geospatial EV Discovery & Checkout Flow	User Retention on AI Mobile Platform

ENGINEERING EXPERIENCE & PRODUCTION SYSTEMS

Full-Stack & Applied AI Engineer — BMI Law (Vera QR & Gideon AI) Enterprise B2B & GenAI — Oct 2025 – Sep 2026 · Istanbul

- **Vera QR (AI-Powered Restaurant Automation & Loyalty SaaS):** Engineered an end-to-end B2B hospitality platform featuring an integrated natural-language *"AI Virtual Waiter"* agent, multi-tenant **PostgreSQL Row-Level Security (RLS)** architecture, CRM analytics, loyalty engine, and **Stripe / iyzico** payment gateways.
- **Gideon AI (Dynamic Generative UI Assistant):** Architected an interactive LLM assistant under BMI Law's digital transformation initiatives that renders dynamic, stateful UI components (*Generative UI Cards*) at runtime instead of plain text, powered by **Next.js, Tailwind CSS, and Supabase Edge Functions**.

Tech Stack: Next.js (App Router), React, TypeScript, Supabase (PostgreSQL, RLS, Edge Functions), OpenAI API / NLP, Stripe, iyzico, Vercel

Full-Stack & Mobile Engineer — VoltNet (Unified EV Charging Network) iOS, Android & Web — Aug 2025 – Aug 2026 · Istanbul

- Engineered a unified geospatial web and mobile platform that normalized fragmented third-party EV charging provider APIs into a single real-time map interface for station availability, routing, and pricing—reducing user friction by **~40%**.
- Designed a scalable backend with **Node.js and PostgreSQL** to handle real-time station telemetry, geospatial queries, and payment transactions across iOS, Android, and Web clients.

Tech Stack: React Native, React.js, TypeScript, Node.js, PostgreSQL, Mapbox GL API, RESTful APIs, Figma

Founder & Lead Developer — Kürşat (Social Network Platform) 5,000+ First-Month Users — Aug 2023 – Jun 2025 · Istanbul

- Architected, built, and shipped a full-scale iOS and Android social network platform, scaling to **5,000+ active users within the first month** of release (2023–2025 product lifecycle).
- Engineered the custom content-feed ranking algorithm, real-time messaging/notifications, content moderation pipelines, and in-app creator monetization layer using **Node.js, MongoDB, and React Native**.

Tech Stack: React Native, Node.js, MongoDB, WebSockets / Realtime, Push Notifications, Mobile CI/CD Pipelines

Mobile & AI Product Engineer — Lusid AI & İyilik Zinciri Mobile & AI Product Lifecycles — May 2023 – Mar 2026 · Istanbul

- **Lusid AI (May 2023 – Jul 2024):** Built a privacy-first AI journaling and collaborative writing app backed by **Supabase (PostgreSQL)** and multi-step LLM prompt pipelines, driving user engagement to **4+ active sessions per week** during its active lifecycle.
- **İyilik Zinciri (Aug 2025 – Mar 2026):** Led client-side rendering and query performance optimizations across iOS and Android clients, significantly improving response latency and daily active user retention (DAU/MAU).

Tech Stack: React Native, TypeScript, Supabase, Firebase, LLM Prompt Pipelines, Mobile Performance Optimization

Founder & Product Engineer — İtibar (B2B Reputation & Data Automation) B2B SaaS & R&D — Oct 2026 – Present · Istanbul

- Building an automated B2B intelligence and reputation defense platform featuring multi-region data pipelines, automated web speed & AI/GEO schema auditing, serverless telemetry tracking (*Vercel Functions*), and AI-assisted compliance workflows.

CORE TECHNICAL SKILLS

Languages & Core:	TypeScript, JavaScript (ES6+), SQL, Python, HTML5, CSS3
Frontend & Mobile:	React.js, Next.js (App Router, SSR/ISR), React Native (iOS & Android), Tailwind CSS, Mapbox GL, State Management
Backend & Databases:	Node.js, PostgreSQL (Row-Level Security / RLS), Supabase (Edge Functions, Realtime), MongoDB, Firebase, REST APIs, Webhooks
Applied AI & LLMs:	LLM API Orchestration (OpenAI / Gemini), Generative UI, Conversational AI Agents, Prompt Engineering, Structured Outputs
Payments, DevOps & Tools:	Stripe, iyzico, Git, Docker, Vercel, CI/CD Workflows, Linux/Unix, App Store Connect & Google Play Console, Figma

EDUCATION

42 Istanbul — Computer Science & Software Engineering
Rigorous peer-to-peer software engineering program focused on algorithms, systems programming, and collaborative delivery.

Ankara University — Bachelor's Degree
2023 – Present

ENGINEERING DISTINCTIONS & LANGUAGES

- **GitHub Arctic Code Vault Contributor:** Recognized for open-source code preserved in the GitHub World Archive.
- **End-to-End Product Lifecycle Track Record:** 5+ full-stack web & mobile products architected, shipped, and operated across iOS, Android, and Web.
- **Languages:** Turkish *(Native)* | English *(Professional Working Proficiency)*
